PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in Python, SQL, Excel, and Power BI, currently working on campaign data processing and validation in an ad-tech environment using CAPE and Adform. Built end-to-end analytics solutions including anomaly detection systems, attribution models, and interactive dashboards analysing 12Cr+ ad spend data. Strong focus on data quality, KPI tracking, and converting raw data into actionable business insights.

SKILLS

- **Languages & Tools:** Python, SQL, Excel, CAPE, Adform, Power BI, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Techniques:** Data Cleaning, EDA, Data Validation, Data Transformation, Classification, Clustering, Regression, Time Series, Dashboarding, KPI Tracking
- **Other:** Prompt Engineering, Content Integration, Data Quality Assurance, Campaign Data Management, HTML5, CSS, JavaScript, Canva, Figma (UI/UX), NLP, Streamlit

EXPERIENCE & LEADERSHIP

Data Processor Consultant **Sept 2025 – Feb 2026**
Plan.net Technest India (House of Communication)

- Process and validate campaign data using CAPE and Adform, ensuring accuracy and consistency in reporting.
- Perform data cleaning and quality checks to support timely analytics and performance tracking.

Social Media Head, *IEEE*

- Managed and executed content strategy, increasing follower engagement by 40% through consistent posting and targeted campaigns.

PROJECTS

GradeFusion.ai Project *Published in 'Journal of Technology'*

- Designed and developed user-friendly, interactive dashboards for an AI coding platform, focusing on UI/UX principles to visualize student performance and real-time feedback.
- **Skills:** React, UI/UX Design, Data Visualization, Front-End Development.

Ad Spend Intelligence Platform

- Analysed 12Cr+ ad spend data across 5 channels using attribution models and anomaly detection to identify performance gaps and misattribution.
- Built and deployed an interactive Streamlit dashboard for KPI tracking and decision support.

Mumbai Billboard Anomaly Detection & Analytics Platform

- Engineered an end-to-end solution to detect advertising fraud using a Python pipeline for feature engineering, an Isolation Forest model for anomaly detection, and a Power BI dashboard and Streamlit app for interactive analysis.

E-Commerce Sales & Superstore Dashboards

- Created interactive dashboards to analyze sales trends, customer value (RFM), and regional performance using real datasets.
- **Tools & Highlights:** Power BI, DAX, Power Query. Monthly Sales Trend, Top Products, Segment/Region KPIs.

Amazon Sentiment Analysis + NLP Projects

- Performed sentiment analysis on 1.5M+ Amazon reviews and built other NLP-based models like Fake News Detection.
- **Skills:** TF-IDF, Logistic Regression vs Naive Bayes.

EDUCATION

Bachelor of Computer Engineering, BTech **Graduated in 2025**
St. Francis Institute of Technology, Mumbai, India

CERTIFICATIONS

- **IBM Data Analyst Professional Certificate** – Coursera
- **Business Analysis Fundamentals** – Microsoft
- **Prompt Engineering** – Udemy
